

I. Project Title

My Grade & Attendance Tracker

II. Problem Statement

Many students write their grades and attendance on paper or loose notes. It is easy to lose, hard to check, and takes time to find old records. This affects every student who wants to know how they are doing in school. It is important to fix so students can stay organized and see their progress fast.

III. Project Objectives

1. Make a program to save and show grades by the end of Week 4.
2. Add a way to record attendance and show how many days you were present by the end of Week 5.
3. Show a simple report of grades and attendance together by the end of Week 6.

IV. Planned Features

- Save subjects and grades
- Save if you were present or absent
- Show your average grade
- Show your attendance percentage
- Show a short summary
- Fix or remove entries

V. Planned Inputs and Outputs

Inputs:

- Your name and grade
- Subject name and score
- Date and if you were present
- What you want to do: add, view, or exit

Outputs:

- Message that your record was saved
- List of all subjects and scores
- Your average grade
- Attendance percentage
- Summary report

VI. Logic Plan — Pseudocode

START

Show program name

Ask your name and grade

REPEAT

Show menu:

1 = Add grade

2 = Add attendance

3 = Show summary

4 = Exit

Get your choice

IF choice is 1 THEN

Ask subject name

Ask your score

Save it

Show "Saved!"

ELSE IF choice is 2 THEN

Ask date

Ask: Present or Absent?

Save it

Show "Saved!"

ELSE IF choice is 3 THEN

Find average grade

Find attendance percentage

Show your name

Show all subjects and scores

Show average grade

Show attendance percentage

ELSE IF choice is 4 THEN

Show "Thank you!"

END

ELSE

Show "Wrong choice. Try again."

UNTIL you choose Exit

END
